Short Presentation (Youtube Video): <https://youtu.be/9Y3xWXk2Z3g>

Professional Summary

Results-driven Technical Support Specialist with 10+ years of hands-on IT experience troubleshooting hardware, networks (LAN/WAN), and web servers in fast-paced environments. Proven expertise administering MS Active Directory and supporting MS Windows, MAC, and mobile (iOS/Android) ecosystems. Expert in executing data backups, disaster recovery operations, and supervising support workflows to consistently beat SLA targets. Currently delivering reliable technical infrastructure support within a major municipal government. International candidate fully prepared to relocate to Calgary for a long-term role, with total flexibility for evening shifts and overtime.

Languages

English: Proficient (IELTS CLB6 – 2023)

French: Beginner – Débutant (Currently Studying)

Portuguese: Native

Spanish: Basic

Work Experience

USER SUPPORT TECHNICIAN

Mogi das Cruzes City Hall – Municipal Government

August 2023 – Present

- Providing comprehensive IT, network (TCP/IP, LAN, WAN), and system support across 75+ public sites, administering MS Active Directory and troubleshooting MS Windows, MAC, and mobile (iOS/Android) environments
- Setting up computer workstations (including Lenovo ThinkCentre, Dell, and HP systems), installing device drivers, deploying desktop applications, and executing routine data backups and disaster recovery operations
- Supervising and coordinating support workflows for junior technical staff to resolve urgent user difficulties and maintain local area network uptime under pressure
- Developing scripts and leveraging AI prompt engineering to automate software deployments, troubleshoot web server hardware/software, and optimize help desk efficiency
- Performing advanced CMD-based diagnostics (ipconfig, netsh, sfc, chkdsk), configuring shared network infrastructure, and conducting precision hardware repairs using multimeters and soldering tools

TECHNICAL SUPPORT TECHNICIAN

Stone

March 2022 – August 2023

- Installed, configured, and tested POS terminals
- Replaced hardware and verified system integrity with structured testing
- Delivered client training and live support on-site

Skills

End-User Technical Support – On-site assistance for hardware, software, and operating system issues in fast-paced environments

Incident & Ticket Management – Logging, tracking, documenting, and resolving user issues with clear escalation practices

Hardware Setup & Troubleshooting – Workstation deployment, peripheral installation, cable management, and basic electronic repair

Windows OS Support – Installation, configuration, diagnostics, and error resolution

Network & Printer Support – LAN connectivity, shared folders, printers, scanners, and Internet access troubleshooting

Technical Documentation – Maintaining problem-and-solution logs, user guides, and internal knowledge bases

User Training & Client Support – Clear communication, guidance, and basic training for non-technical users

Attention to Detail & Organization – Accurate configuration, documentation, and follow-up in repetitive and time-sensitive tasks
